

# Walkway Mat for flat roofs

From recycled plastic we make surfaces  
for humans and animals sustainably better.

[www.kunststoffmatten.de/en](http://www.kunststoffmatten.de/en)

## Field of application:

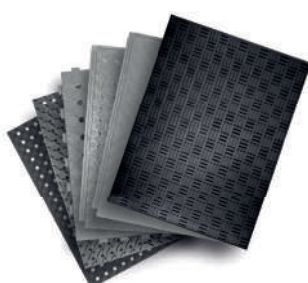

Maintenance paths and walkways on flat roofs.

## Description:

With our special mats for flat roofs, non-slip maintenance paths can be created quickly and inexpensively. To make inspection and maintenance paths on flat roofs easier or to enable safe crossing, all you have to do is lay our mats. In this way, non-slip paths on flat roofs can be created easily, quickly and inexpensively. These ensure that the roof waterproofing is not damaged by people or work equipment on it and, of course, also provide the necessary protection for workers at airy heights. This is provided even in adverse weather conditions, as our mats have increased slip resistance even when wet.

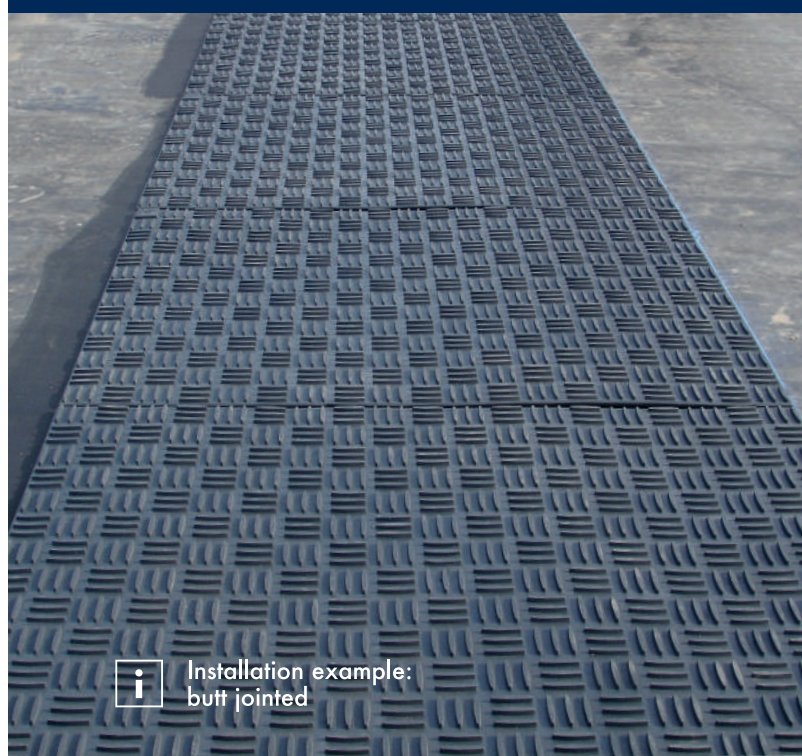

## Properties:

Resistant to UV radiation, increased slip resistance even when wet, optimum protection for the geomembranes, available in various materials, colours and thicknesses, easy to install.

**FG Kunststoffmatten GmbH**  
Hannoversche Straße 23  
31547 Rehburg-Loccum
