

Indoor mat

Field of application:

Tent construction, exhibition stand construction, events, garages, workshops, warehouses, industrial halls, production facilities, leisure area.

Description:

Thanks to their robustness and insulating properties, these mats are ideal for use in garages, carports and workshops for private use. But our indoor mats can also be used very well in warehouses, workshops and production facilities, as the fire protection criteria are met. In addition, it makes the floor non-slip and more comfortable for employees who have to walk and stand a lot. Due to the mat's flame retardancy, it can also be used in exhibition halls and marquees without any problems with regard to the Ordinance on Places of Assembly. Another advantage is the easy cleaning if, for example, something spills out during production or in the workshop or garage.

Properties:

Insensitive to chemical substances and UV radiation, high load-bearing capacity (15 to/m²), insulating, force-absorbing, trafficable, easy to lay, cost-saving, durable. Fire behaviour: Bfl-S1 according to DIN EN 13501-1.
