

Drive-On Edge

Field of application:

addocks, paths, feeding places on pastures, yard stabilisation and much more.

Description:

Our drive-on edges are the ideal accessories for our plastic mats. They are available in two different heights (30 and 40mm) and provide the perfect finish to our mats. Depending on the orientation of the mats, the edges are placed under or on top of the mats and hook into them, creating a firm bond that can be driven over by equipment. The Drive-on Edges are compatible with almost all our mats.

Properties:

Resistant to chemicals and UV radiation, easy to lay, can be driven on durable, can be cut to size.
